

# BLOCKADER® X-Base

## The Best Square Stacking Barrier Available

Swing gate allows access to fire hydrants

The X-Base barrier is the classic BLOCKADER® frame with a modified base. Our introduction of the bolt-on replaceable base was the most revolutionary advancement in the development of the steel barrier.

Easy to transport

Stacks square in both directions

**Why buy an “adequate” barrier when you can get a superior one for virtually the same price?**

### Look at the advantages of the BLOCKADER® X-Base:

**BLOCKADER:**

- 42 pounds (20% more steel) **ADDED STRENGTH**
- Bolt-on bases
- Stacks square in both directions
- All popular hooking variations
- Adaptable to arches and gates

**COMPETITION:**

- 36 pounds
- Spot-welded bases, subject to cracking, rusting
- All hooks need to be on one side (extra labor) or units will not stack square
- Only one hooking option
- Not adaptable to arches and gates

Bolt on replaceable base with solid, saddle-cut welds are stronger. Oversize welds are much weaker and crack frequently due to their inconsistent density.
