

Black Painted Heavy Duty Barrier Cart Currently Available To Ship

BLOCKADER® introduced portable barrier carts in 1995, and has continually improved the design, strength and efficiency in newly-introduced models. Our latest improvements enable you to save even more time and labor.

Pull Cart

Product Number: BT-150

Flexible, versatile, and extremely strong

- Made of heavy duty steel
- Locking front wheels to prevent cart from rolling
- Can be loaded two ways – full offset on each side, or partial offset on both sides
- Can be used for all standard frames, including square stacking barriers
- Ideal loading height – no projections above the frame
- Handles corners well and remains stable, even with half-loads
- Carted barriers can be pulled, or lifted by forklift
- Can hold approximately 28 barriers

WARNING: This portable cart for pulling and lifting steel barriers is for internal, off-road use within private facilities. It is not meant for moving barriers on the open road.

Push Cart

Product Number: BT-251

Increase ease of transporting barriers

- Made of heavy duty steel
- Locking front wheels to prevent cart from rolling
- Can be loaded two ways – full offset on each side, or partial offset on both sides
- Revised to reduce the risk of overloading
- Easy to assemble and store
- Ideal weight and stability for one person to push
- Can hold approximately 8-10 barriers
